

Akash Gupta

Senior Software Engineer | Backend Developer | Full Stack Developer

skygupta193@gmail.com | +91 91407 04542 | Bengaluru, India | linkedin.com/in/akashguptasky | github.com/akashguptasky | akashguptasky.github.io

PROFESSIONAL SUMMARY

Backend-focused full-stack engineer with 3+ years building scalable Node.js and TypeScript services, REST APIs, and microservices. Skilled in MongoDB, PostgreSQL, and Redis, with hands-on work in workflow automation, API gateway design, and performance optimization. Proven record of improving performance, reducing latency, and shipping features end to end.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Java (core), SQL
Backend	Node.js, Express.js, NestJS, REST API design, Microservices, API Gateway, JWT / OAuth
Frontend	React, Angular, HTML, CSS
Databases & Messaging	MongoDB, PostgreSQL, MySQL, Redis, BullMQ, Kafka
Cloud & DevOps	AWS, Docker, CI/CD, Git
AI-Assisted Dev	Claude, ChatGPT, Gemini, Cursor, GitHub Copilot
Practices & Tools	Agile / Scrum, Postman, Performance Optimization, WorkOS, Multi-tenancy

PROFESSIONAL EXPERIENCE

Senior Software Engineer, DevVoid Nov 2025 - Present | Bengaluru (Remote)

- Build and own features end to end on a multi-tenant CRM and sales-automation platform, spanning MongoDB data models, Node.js and TypeScript services, and the React front end.
- Design workflow-automation components (triggers, actions, and asynchronous approval flows) on a Redis and BullMQ job pipeline, enabling non-technical users to automate multi-step business processes.
- Implement AI-agent tool-calling and linked-entity resolution, and strengthen platform security through cross-tenant data isolation and authentication hardening.

Deltatech Gaming Ltd. Nov 2022 - Sep 2025

Software Engineer Apr 2024 - Sep 2025 | Remote

- Built and optimized Node.js microservices, improving service performance by approximately 15%.
- Led a platform migration and admin-panel revamp following a company acquisition.
- Designed API gateways that reduced request latency by approximately 20%; mentored junior developers and ensured on-time releases.

Junior Software Engineer May 2023 - Mar 2024 | Gurugram

- Integrated a PAN-tampering detection API to identify and flag fraudulent documents.
- Developed Angular modules that improved user engagement; worked hands-on with AWS services and MySQL.

Graduate Engineer Trainee Nov 2022 - Apr 2023 | Gurugram (On-site)

- Built and maintained backend Node.js services and REST APIs; promoted to Junior Software Engineer within six months.

Back End Developer (Apprenticeship), FunctionUp May 2022 - Sep 2022 | Bengaluru

- Built REST APIs with Node.js, Express, and MongoDB, covering authentication, validation, and data modelling end to end.

PROJECTS

URL Shortener Node.js, Express, Redis, MongoDB

Short-link service that generates unique codes and resolves them quickly using Redis caching, with URL validation on input. github.com/akashguptasky/URL-Shortner

Blogging Site API Node.js, Express, MongoDB, JWT

Blogging platform back end with author accounts, blog CRUD, JWT authentication, and input validation. github.com/akashguptasky/S-Blogging-site

Telegram Auto-Post Publisher Node.js, Telegram Bot API

Automated bot that schedules and publishes posts across multiple groups, reducing manual posting effort by approximately 80%.

EDUCATION

Bachelor of Computer Applications (BCA), Ravindranath Tagore University, Bhopal 2017 - 2020

CERTIFICATIONS

Node.js Backend Development - FunctionUp (2022) • J2SE (Core Java) - Bytecode IT Solutions (2022) • HTML - GeeksforGeeks (2021)
